

Application. No.: 10/643,161  
Filing Date: August 18, 2003  
Response dated: December 19, 2006

### **Specification Amendments**

Please delete the graphs comprising line 1 of page 4, line 2 of page 5, and line 2 of page 11.

In the “Brief Description of the Drawings” section, please add on page 16 at line 15 the following paragraphs:

Fig. 7 is a graphical representation of conventional voltage and current spikes associated with supplying a voltage and current with the same polarity as the voltage and current present within a motor rotating in a given direction.

Fig. 8 is a graphical representation of conventional current and voltage spikes associated with supplying a reversed plurality voltage and current to a motor traveling in a given direction.

Fig. 9 is a graphical representation of the voltage current spikes of one embodiment of the current invention when a voltage and a current are applied to a motor containing a voltage and current with an opposite polarity.
